

# IN THEIR SHOES

We shall learn about what it feels like to empathise—how we can all learn from the actions of other people from different times and cultures and the impact this can have on how we behave.

***“You never really know a man until you stand in his shoes and walk around in them.”***

**HARPER LEE**

# OUT OF THIS WORLD

Not only will we learn about places beyond the Earth, but also about the amazing things that can be discovered on our planet too! We shall also discover about what we can do to feel ‘out of this world’ and enable us to have a great sense of well-being....

***“It’s useful to go out of this world and see it from the perspective of another one.”***

**TERRY PRATCHETT**

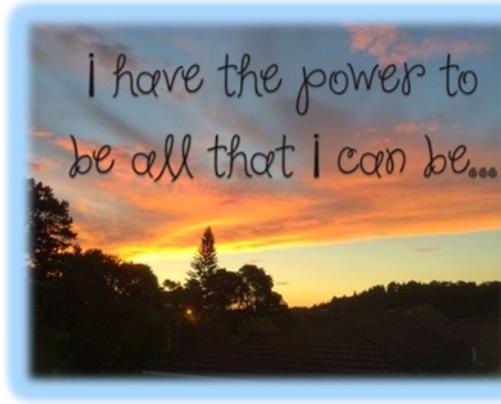

# ON OUR DOORSTEP

We shall learn about our locality and grow a real sense of community spirit. Learning from what’s immediately around us can teach us the importance of working together and being thankful for our environment and our families and friends. Whether that’s looking at Egginton or further afield in Derbyshire, we shall develop a love from what is actually on our doorstep...

***“You don’t need to go to the ends of the earth, you don’t need to climb Everest to have a great adventure, it’s invariably on our doorstep.”***

**BEAR GRYLLES**

Our curriculum is based on whole school themes each term that teach us ***‘To be all that I can be’***. We learn from what people have done in the past and present and how this affects our own lives now and how it could affect us in the future. We want to be the very best versions of ourselves and these themes allow us to do that.

All of the National Curriculum subjects are delivered within these themes and with regular reference to how we learn about ourselves through these, children at Egginton Primary are prepared for everything that life throws at them. They learn how the actions and experiences of others have affected the world and then apply this knowledge to their own lives.

# POWER

We learn about how power is used in everyday life in terms of energy and consider how power will be used in the future. Not only will we learn about power in Science but also how people have used their power as leaders. This will help to shape how we use power when we have it in our futures...

***“Knowledge is power.”***

**FRANCIS BACON**

# Long, Long Ago...

How do the events and the actions of people long, long ago impact us now? What can we learn from people’s decision making to help us now and in the future become all that we can be?

***“I sit beside the fire and think of people long ago, and of people who will see a world that I shall never know.”***

**JRR TOLKIEN**

# AMAZING JOURNEYS

Whether it’s the amazing journeys that people have been on across the world or the life cycles of animals and plants, all of us are on an incredible journey and we shall celebrate the things that have happened or may happen still!

***“Your life is a journey of learning to love yourself first and then extending that love to others in every encounter.”***

**OPRAH WINFREY**
